SOLUTION Formost, if not all, Windows Operating Systems: FAT32recovery: ChkdskDoes Not Use Backup Boot Sector to Fix Corrupted FAT32 Boot Sector OR Dskprobe...com to have no spyware, viruses, oradware It has a number of data recovery capabilities.

The tests included: deleting the first boot sector, deletingany applicable backup boot sectors, deleting all boot sectors, andperforming these tests on different file systems (FAT/FAT32).. In dskprobe: read sector in andthen go to: file->save as) I also suggest you practice what youcan on a usb thumbdrive you don't care about beforehand.. Unfortunately, I recently hadto deal with this situation after my external hard drive lost powerwhile in use.
